

Meet Samandar Khan

a student who wants to achieve his **academic comeback**
and a **4.0 GPA**, however, there is one thing stopping
him....

he spends most of his days day-dreaming, thinking about which course to study for, and what topics to cover, and in the end, he used to get no work done...

Like Samandar Khan, most university students suffer from the same problem, **spending too much time planning their comeback**, rather than achieving it.

that's why we introduce

proxy

a web-app to do the planning for you, so you can focus
on actually studying and increasing your academic
performance

how does the app help you?

- Track all your course progress at one place (no more guessing games)
- concrete, concise actionable tips to achieve your target and goals
- tells you how much effort to put in for what course.

further developements (not included in the mvp)

- using ML to predict final grades based on current performances
- using ML to suggest topics student needs to get a stronger hold on
- syncing with LMS / MS Teams to enable real-time data feed
